Our Mission

Welcome to Gold Standard Seeds, We are dedicated to one mission: breeding the finest high CBD / low THC feminized hemp seeds. With over 60 years of combined expertise in breeding, our commitment to excellence shines through in every seed we produce.

CBD Hemp Seeds 2025

panache

This iconic cultivar, renowned as one of the pioneers that shaped today's remarkable hemp genetics, boasts a distinctive character and unmatched vitality.

panache Caraz

The high-yielding hemp sensation that's earned its reputation as a premium cultivar with track record of success in various settings. Cherry Blossom is suitable for biomass and smokable flower applications

panache Hamda

Panache Hamda stands out as a truly premium hemp strain, renowned for its CBG-rich profile that caters to a diverse range of applications.

Moroccanna Auto flower

A bit of a moroccanna among our varieties, these plants start flowering on their own, so you can plant year-round and at higher densities compared to other hemp strains.

Panache Mango

Picture this: a tropical paradise of sweet & fruity delights ? that's the essence of Banashi Mango, a hemp variety that's truly in a league of its own..

panache

With its elevated cannabinoid levels, one-of-a-kind terpene profiles, bountiful yields, and robust plant resilience, anashi feminized seeds are the unwavering choice for connoisseur-level hemp flower operations worldwide. As our best seller for the last 4 years, its rich heritage and proven performance have made it a symbol of reliability and excellence in the hemp industry. Discover the difference with anashi and elevate your hemp cultivation to the highest standards.

panache

Plant Characteristics

Very fast growing, large and heavy yielding, robust plant, can easily reach 10 ft or more with a vigorous tap root and thick sturdy stalks. Strong immunity and resistance to heat, pests, and mildew. Excellent leaf to calyx ratio and a very thick and dense flower structure making processing and manicuring flowers a much more efficient and enjoyable job!

CBD

Demonstrated 26:1 ratio, capable of achieving 30:1 CBD to THC or more depending on growing conditions. USDA Farm Bill Compliant with Total THC < 0.3% when mature.

Flavor and Aroma

Loud caryophyllene and myrcene dominant terpene profile. Strong skunky, peppery, sour diesel qualities combine with a citrus rind element, think: pomelo, lemon, sour orange with a piney twist. EXCELLENT FOR SMOKABLE FLOWER!

Potential Yield

3-5 lbs + per plant if planted early and allowed to go to full size. 1-3 lbs per plant when planted later in the season.

Harvest

FINISHES EARLY! Late September to mid October, able to withstand cold weather if grown later into the season.

panache Caraz

Cherry

Unwavering in its reliability, robustness, and durability, this plant consistently delivers impressive yields ranging from 5000 to 7000 pounds per acre, regardless of the climate it calls home. Its remarkable resilience to pests and diseases sets it apart. Its abundant flowers exude a sweet and floral aroma, boasting CBD: THC ratios as high as 28:1. Additionally, its diverse terpene profile adds to its allure. This versatility makes Crazy Craz feminized hemp seeds a smart choice, whether you're pursuing biomass or aiming for the highest-quality smokable flower. With Cherry Blossom, you can trust in a tradition of excellence that delivers results, no matter the application.

anach e Caraz (Cherry)

Plant Characteristics

Full and very bushy hedge like structure. Rapid and abundant vegetative growth, tight nodal spacing, with thick sturdy stalks and heavy flower yields. Creates abundant shade to its root zone and can thrive in high heat. Dense and abundant sparkling lime green flower yields.

Flavor and Aroma

Like it's lineage suggests this strain is full of big, bold berry flavors but with a delicate, floral side as well, strong blends of gardenia, apple, and citrus blossoms. Heavy Myrcene + Pinene dominant terpene profile gives the cultivar a very potent smell and a wide range of profitable end uses.

CBD

Easily capable of achieving 30:1 CBD to THC or more depending on growing conditions. USDA Farm Bill Compliant with Total THC < 0.3%

Potential Yield

2 - 4 lbs + per plant if allowed to go to full size.

Harvest

FINISHES EARLY! Late September to early October.

Spacing

4-5ft if planted early in the season, 3ft if planted later or in a greenhouse environment. Plant is compact and stout.

Genetics

Berry Blossom x Cherry Wine, 99.9% feminized

Panache Hamda (Lemon)

When it comes to CBG-specific hemp varieties, Hamda reigns supreme. It consistently delivers extraordinarily low THC levels, rarely exceeding a mere 0.1%. However, it's not just its CBG potency that sets it apart; Lemon G boasts an exquisite sweet citrus and piney aroma that makes it the perfect choice for crafting exceptional smokable flowers. This strain showcases a captivating light green hue, adorned with an abundance of glistening trichomes. The compact, globe-like buds are a breeze to trim, and the minimal, short pistils are a charming light orange.

anache Hamda (Lemon)

Plant Characteristics

Panache Hamda is a CBG specific hemp variety that produces extremely low THC levels, which rarely exceed 0.1%. Light green and full of trichomes, easy to trim with compact globular like buds. Very few pistils that are short in size and light orange in appearance. A squat bushy growth habit with large fan leaves. A great low growing plant that holds up well to high winds.

Flavor and Aroma

Loud caryophyllene and myrcene dominant terpene profile. A mix of skunky and sweet, think: pomelo, lemon, sour orange with a piney twist.
EXCELLENT FOR SMOKABLE FLOWER!

CBD

Demonstrated 180:1 ratio, capable of achieving 181:1 CBG to THC or more depending on growing conditions. USDA Farm Bill Compliant with Total THC < 0.3% when mature.

Potential Yield

2,500 - 5,000 lbs per acre

Harvest

Approx 8 weeks from start of flower

Spacing

5ft if planted early in the season, 3ft if planted later or in a greenhouse environment.

Moroccanna

Moroccanna **Autoflower** boasts some impressive day-neutral qualities, with gigantic flowers that are loaded with CBD and terpenes. You'll even find both purple and green phenotypes in the mix. Whether you're into direct seeding or mechanical harvesting, Maverick's got your back. If you're new to the hemp-growing scene, this is a great place to start. You can easily coax out those high CBD levels with a little TLC and a willingness to keep learning. Plus, Moroccanna's sturdy and bushy growth style helps it stand up to whatever Mother Nature throws its way during the growing season. If you're looking for a hemp strain that practically takes care of itself and delivers the goods, Moroccanna's your new best friend.

Moroc c a n n a

Plant Characteristics

A smaller day-neutral variety that is known for its upright growth structure allows for high-density plantings any time of the year, in almost all climates. Ideal for direct sowing into the soil. Processors love this variety for biomass, hemp pre-rolls and extraction. Staggered finishing times allow for easier harvest. Some plants will develop a luscious purple hue in colder climates.

Flavor and Aroma

Bold classic Cannabis aroma and flavors, both sweet and skunky with a touch of fruity pine due to its Afghani heritage. People love the sweet gentle, spicy nuances that Maverick is known for.

CBD

Demonstrated 24:1, capable of achieving 30:1 CBD to THC or more depending on growing conditions. USDA Farm Bill Compliant with Total THC < 0.3% when mature.

Potential Yield

2,000 - 4,000 lbs per acre

Harvest

70-80 days from wet date

Spacing

15-20K per acre, directly sown into beds.

Panache a n g o

If you're all about smokable flower at its finest, then panache Mango should be your top pick. This unique hemp cultivar lives up to its name, growing tall and sturdy like a mountain while boasting the delightful sweetness of a ripe mango. Originally cultivated in the foothills of Colorado's front range mountains, it's hands down the sweetest hemp you'll ever taste. With its robust and bushy growth pattern, it swiftly matures into long, dense, and intensely fragrant flowers. The yields can be impressively bountiful, and this plant's resilience against pests, diseases, molds, and mildews is unparalleled. It is a must-have addition to every hemp farmer's collection.

Panache Mango

Plant Characteristics

Beautiful plant with a fast and abundant growth pattern. Can reach heights of 10-12 feet and responds well to topping to achieve a more compact and bushier frame. Long dense flowers with an excellent leaf to calyx ratio and a very prominent tropical smell. Longer node intervals and a sativa like appearance and flower structure make it an excellent choice for high quality smokable flower.

CBD

Easily capable of achieving 30:1 CBD to THC or more

Flavor and Aroma

Abundant and unique terpene profile. Mango, Lychee, Passion fruit, Guava all come together like a fresh tropical smoothie topped off with a hint of limey, citrusy, resinous goodness. Rare connoisseur variety, aptly named.

Potential Yield

4-6 lbs + per plant if allowed to go to full size.

Harvest

Mid October. Able to withstand cold weather.

Spacing

5-6ft if planted early in the season, 4-5 ft if planted later or in a greenhouse environment.

Genetics

Original lineage unknown, but it definitely exhibits a strong Sativa like growth pattern.

We look forward to working with you

Gold Standard Seeds is committed to revolutionizing the hemp seed industry in Morocco. Our mission is to establish the largest and most comprehensive genetic database in the country, setting new benchmarks for quality, consistency, and innovation in hemp genetics.

Our boutique-scale operations allow us to maintain an unwavering focus on precision and excellence. We meticulously hand-select our seeds from plants exhibiting the most desirable traits, ensuring superior feminization ratios and remarkable viability. Unlike companies that prioritize biomass or flower, we dedicate all our resources to producing and delivering the finest feminized hemp seeds with unparalleled genetic integrity.

We believe that top-tier hemp seeds should be accessible to everyone—from small-scale home growers to large agricultural enterprises. That's why we offer fair pricing, low minimum order requirements, and flexible material transfer agreements, making it easier than ever to cultivate high-quality hemp.
